PROFESSIONAL SUMMARY

Entry-level **Software Developer and Full-Stack Engineer** who genuinely enjoys turning real-world problems into clean, reliable software. I have hands-on experience building and deploying applications with **Laravel, PostgreSQL, REST APIs, and cloud platforms**, and I've been involved in the complete journey—from understanding business needs and designing solutions to shipping, supporting, and improving live production systems. I care deeply about writing **secure, scalable, and readable code**. I've worked on payment-enabled, data-sensitive platforms with strong emphasis on security and access control. Naturally curious and eager to learn, I thrive in **startup and consulting environments** where ownership, continuous improvement, and collaboration matter.

CORE SKILLS

Frontend: React 19, Next.js 15, HTML5, CSS3, Tailwind CSS, Bootstrap, Alpine.js

Backend & APIs : **Laravel (PHP)**, Express.js, RBAC, REST API design and integration.

Databases: MySQL, PostgreSQL (SQL & relational data modeling)

Software Engineering: Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), MVC architecture and commonly used backend design patterns, Authentication & Authorization, Code Optimization

Cloud & DevOps: Hybrid Cloud Fundamentals, Vercel, Git, GitHub, CI/CD basics

Methodologies: Agile-based Development, Collaborative & Iterative Delivery

Programming Languages: Java, JavaScript, C, C++, PHP

EDUCATION

Maharashtra Institute Of Technology, Chh. Sambhajinagar

2022 – 2026

Bachelor of electronics and computer engineering

CGPA : 9.4

AI & ML (Minor)

A

Shree. Chatrapati Shivaji college, Balsur

2021-2022

HSC (PCMB)

Marks : 70.50

Shaheed Bhagatsingh High School

2019 – 2020

SSC

Marks : 89.40

EXPERIENCE

Symetrique

February 2025 – Aug 2025

Data Analyst

united states, remote

Software Developer (Full Stack) | Data Analyst

- Participated in the **complete SDLC**, including requirement analysis, system design, development, testing, deployment, and post-release support. **physiciandata.thesymetrique.com** – A subscription-based data selling platform with:
- Designed and developed **production-grade web applications** using Laravel, MySQL, and REST APIs with a focus on performance, security, and maintainability.
- Analyzed existing system issues and proposed solution enhancements in collaboration with architects and technical leads.
- Built secure **role-based access control (RBAC)** systems with Admin/User dashboards.
- Integrated **PayPal payment gateway** for subscription-based platforms with automated access control after payment confirmation.
- Developed interactive dashboards and comparative data visualizations, reducing manual analysis effort by **25%**.
- Collaborated with cross-functional stakeholders to deliver **customer-focused and business-aligned solutions**.

Key Projects:

- thesymetrique.com (Corporate Portfolio Platform)
- physiciandata.thesymetrique.com (Subscription-Based Data Platform)

SELECTED PROJECTS

News_MIT – College News & Events Management Platform

|Laravel 11 , PHP 8.1 , MySQL , Tailwind CSS , Alpine.js , Vite

Nov 2025

Designed and developed a full-stack news portal with a public frontend and role-based admin panel.

- Built a complete **news and content management platform** with a public website and an admin panel.
- Designed REST APIs for managing news, categories, users, comments, and subscriptions.
- Implemented **secure authentication and role-based access** for admins, writers, and users.
- Added approval workflows to manage drafts and publishing smoothly.
- Built commenting and engagement features with proper authorization checks.
- Added multi-language support, SEO settings, and configurable site content.
- Focused on clean architecture, readable code, and long-term maintainability.

MIT1stJob – Training & Placement Management Platform (Freelance / Independent Project)

| *Laravel, PHP, MySQL, HTML, CSS, JavaScript, REST APIs* (<https://mitfirstjob.free.nf>)

April 2025

- Designed and developed an **end-to-end Training & Placement Management and Student Development platform** for MIT students (MITians), independently handling **requirement gathering, system design, development, testing, deployment, and maintenance**.
- Built the platform specifically for **Students, TPOs (Training & Placement Officers), and Recruiters**, automating the complete campus recruitment lifecycle.
- Implemented **multi-role based authentication and authorization**, enabling multiple admins for handling distinct responsibilities such as job posting, student analytics, learning resources, news, blogs, and placement coordination.
- Enabled TPOs to **manage student records, verify eligibility, post jobs on behalf of recruiters, and schedule campus recruitment rounds** seamlessly.
- Developed recruiter dashboards allowing recruiters to **create job postings with eligibility criteria, manage applicants, and schedule recruitment stages**.
- Implemented an **eligibility-driven job application system**, ensuring students can apply only for jobs they are qualified for.
- Built automated **notification systems** to keep students informed about job applications, schedules, and placement updates.
- Digitized and streamlined placement workflows, **reducing manual effort and improving operational efficiency** for the placement cell.
- Enhanced student engagement and institutional branding by providing a **centralized, transparent, and scalable placement ecosystem**, helping colleges stand out and better prepare students for industry opportunities.

Other Projects

- **Coffee-Blend** – Cafe Management System.(Laravel)(<https://mycafe.free.nf>)
- **MIT News Platform** — College news & events system

CERTIFICATIONS

- Cloud Computing – IIT Kharagpur (Elite Grade)
- Programming in Java – IIT Kharagpur NPTEL
- AI & ML Minor Specialization & Other TCS iON, Udemy And Infosys Springboard Certification in similar domain.

ACHIEVEMENTS

- Avishkar Project Selection — CareerCatalyst (AI-based job platform)
- Leadership roles in ECESA & IETE Student Forum
- Organized & led technical events (TechnoSpark, IoT Bootcamp, VLSI Fundamentals)

ADDITIONAL DETAILS

- Strong written and verbal **communication skills**
- Analytical thinking and structured **problem-solving ability**
- Strong interest in **Hybrid Cloud, AI, and Consulting-driven technology solutions**
- Passion for Data Science, ML, and problem-solving
