PROFESSIONAL SUMMARY

Entry-level **Software Engineer** and **Full Stack Developer** with strong foundations in **Java, Python, JavaScript, C/C++**, and hands-on experience across the **Software Development Life Cycle (SDLC)** including design, development, testing, deployment, and support. Experienced in building **scalable, secure, and cloud-deployed applications** using modern frameworks and databases. Passionate about **problem-solving, hybrid cloud technologies, AI-driven systems**, and delivering **customer-focused solutions** in collaborative consulting environments.

CORE SKILLS

Frontend: React 19, HTML5, Angular, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Next.js, Express.js, Laravel (PHP)

Databases: MySQL, PostgreSQL (SQL & relational data modeling), Supabase

Software Engineering: Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), REST APIs, Authentication & Authorization, Debugging & Testing, Code Optimization

Cloud & DevOps: Hybrid Cloud Fundamentals, Vercel, Git, GitHub, CI/CD basics

Methodologies: Agile-based Development, Collaborative & Iterative Delivery

Programming Languages: Java, Python, JavaScript, C, C++, PHP

EDUCATION

Maharashtra Institute Of Technology, Chh. Sambhajinagar

2022 – 2026

Bachelor of electronics and computer engineering

CGPA : 9.4

AI & ML (Minor)

A

Shree. Chatrapati Shivaji college, Balsur

2021-2022

HSC (PCMB)

Marks : 70.50

Shaheed Bhagatsingh High School

2019 – 2020

SSC

Marks : 89.40

EXPERIENCE

Symetrique

February 2025 – Aug 2025

Data Analyst

united states, remote

Software Developer (Full Stack) | Data Analyst

- Participated in the **complete SDLC**, including requirement analysis, system design, development, testing, deployment, and post-release support. **physiciandata.thesymetrique.com** – A subscription-based data selling platform with:
- Designed and developed **production-grade web applications** using Laravel, MySQL, and REST APIs with a focus on performance, security, and maintainability.
- Analyzed existing system issues and proposed solution enhancements in collaboration with architects and technical leads.
- Built secure **role-based access control (RBAC)** systems with Admin/User dashboards.
- Integrated **PayPal payment gateway** for subscription-based platforms with automated access control after payment confirmation.
- Developed interactive dashboards and comparative data visualizations, reducing manual analysis effort by **25%**.
- Collaborated with cross-functional stakeholders to deliver **customer-focused and business-aligned solutions**.

Key Projects:

- thesymetrique.com (Corporate Portfolio Platform)
- physiciandata.thesymetrique.com (Subscription-Based Data Platform)

SELECTED PROJECTS

OmSai Bhojnalay – Commercial Mess Management System

| *Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Hybrid Cloud Deployment (omsai.online)*

Nov 2025

A full-scale production web platform for a commercial mess business.

- Led an **end-to-end freelance project** by independently handling **requirement gathering, system design,**

development, testing, deployment, and support.

- Designed the solution directly with the business owner, translating operational challenges into a **scalable digital platform**.
- Built a **full-scale production system** with User and Admin dashboards using role-based authentication.
- Implemented **secure authentication and authorization** using Supabase with Row Level Security (RLS).
- Integrated third-party services including **PhonePe Payments**, WhatsApp Cloud API, and Google Maps API.
- Deployed the application on a **hybrid cloud environment** using Vercel, ensuring high availability and performance.
- Performed **testing, debugging, and performance optimization** to deliver a reliable, maintainable system used by real customers.

RateStore – Store Rating & Review Platform

| *Next.js 16, TypeScript, Prisma, PostgreSQL, Tailwind CSS* (<https://ratestores.vercel.app/>)

Jan 2026

Built a full-stack store rating platform enabling users to discover stores and submit ratings.

- Designed and implemented **role-based dashboards** for System Admin, Store Owners, and Users.
- Developed secure **JWT-based authentication** with HTTP-only cookies and RBAC.
- Created scalable **REST APIs** for stores, users, ratings, and analytics using Prisma ORM.
- Implemented admin analytics for monitoring users, stores, and ratings at platform level.
- Enabled store owners to manage ratings with filtering, sorting, and average score insights.
- Focused on clean architecture, secure data handling, and maintainable production-ready code.
- Delivered a responsive, modern UI with dark/light mode and smooth user experience.

Other Projects

- **Malang-ras-dandia**– Dandiya Ticket Booking System. (<https://malangevents.com/>)
- **MIT News Platform** — College news & events system

CERTIFICATIONS

- Cloud Computing – IIT Kharagpur (Elite Grade)
- Programming in Java – IIT Kharagpur NPTEL
- AI & ML Minor Specialization & Other TCS iON, Udemy And Infosys Springboard Certification in similar domain.

ACHIEVEMENTS

- Avishkar Project Selection — CareerCatalyst (AI-based job platform)
- Leadership roles in ECESA & IETE Student Forum
- Organized & led technical events (TechnoSpark, IoT Bootcamp, VLSI Fundamentals)

ADDITIONAL DETAILS

- Strong written and verbal **communication skills**
- Analytical thinking and structured **problem-solving ability**
- Strong interest in **Hybrid Cloud, AI, and Consulting-driven technology solutions**
- Passion for Data Science, ML, and problem-solving
